NUTRA D3 50ml

Vitamin D3 (cholecalciferol) is a fat-soluble vitamin that contributes to the normal development of bones and teeth as well as the proper functioning of the immune system. Promotes absorption of calcium and phosphorus in the intestine while maintaining a balance of concentration between the two elements.

The formulation has as its sweetener the erythritol, natural sweetener produced by fermentation from yeast *Saccharomyces Cerevisiae* starting from dextrose:

- glycemic index and insulin index of 0 (suitable for diabetics)
- great taste
- free of after-taste
- high digestive tolerance
- does not promote dental caries (tooth friendly)

Vegan Friendly: without the use of compound substances or animal derivatives.

GMO Free: without the use of substances composed or derived from genetically modified organisms.

Gluten Free: gluten-free ingredients.

Diabetic Friendly: no added sugar.

NUTRA D3 is a **dietary supplement** based on **vitamin D3** which is normal to calcium and phosphorus, normal calcium levels, the well-being of bones and teeth, the immune system and intervenes in the process of cell division.
