## NUTRA FER 50ml

Integrator based on **Liposomal Iron** (ferric pyrophosphate carried by phospholipidic membrane of vegetable origin) with natural Vit.C extracted from **Rose Canina** berries. Titrated to 70% Vit. C (favors the absorption of Iron).

The sophisticated technology of incorporation into natural phospholipids makes the iron highly bioavailable, well tolerated and rapidly absorbed with less incidence of side effects (gastralgia).

Iron plays an important role in the formation of hemoglobin which provides for the distribution of oxygen in the tissues for correct functionality.

A reduced contribution in the iron diet causes an insufficient production of hemoglobin called Sideropenic or martial anemia. It affects all age groups, mainly **children, women of childbearing age, pregnant and breastfeeding.**

The formulation has as its sweetener the erythritol, natural sweetener produced by fermentation from yeast *Saccharomyces Cerevisiae* starting from dextrose:

- glycemic index and insulin index of 0 (suitable for diabetics)
- great taste
- free of after-taste
- high digestive tolerance
- does not promote dental caries (tooth friendly)

**Vegan Friendly:** without the use of compound substances or animal derivatives.

**GMO Free:** without the use of substances composed or derived from genetically modified organisms.

**Gluten Free:** gluten-free ingredients.

**Diabetic Friendly:** no added sugar.

**NUTRA FER** is a **food supplement based on iron** which contributes to normal cognitive function, energy metabolism, the formation of red blood cells and hemoglobin, the transport of oxygen to the body, the function of the immune system, the reduction of tiredness and fatigue and intervenes in the process of cell division. The product is enriched with rose hip containing vitamin C which increases the absorption of iron.

### **Iron based supplement**

50 ml glass bottle with incorporated dropper

1 ml of product corresponds to 10mg of iron in liposomal form.

**Ingredients:** Water; sweetener: Erythritol; rose hip (*Rosa canina* L., rosehips) e.s. titrated to 70% in ascorbic acid; liposomal iron (iron pyrophosphate); natural blood orange flavor; acidifier: citric acid; stabilizers: potassium sorbate, sodium benzoate.
